PROFILE

Final-year Information Technology student with hands-on experience developing server-based solutions for business environments. Completed a part-time project using Oracle, demonstrating strong backend development and SQL optimization skills. Passionate about designing scalable, efficient systems that improve business processes. Adept at problem-solving, quickly learning new technologies, and delivering clean, maintainable code in both team and solo settings.

WORK EXPERIENCE

Bond gallery

2022

Freelance IT Assistant

- Contributed to a live system used in the day-to-day operations of a professional mortgage brokerage.
- Contributed to integrating the software with existing business workflows, helping staff transition smoothly.
- Identified and corrected database-related bugs to improve system accuracy and reliability.
- Supported the deployment and testing of business logic components under developer supervision.
- Gained real-world experience working with Oracle databases.
